

How To: Create Student Accounts/Enroll

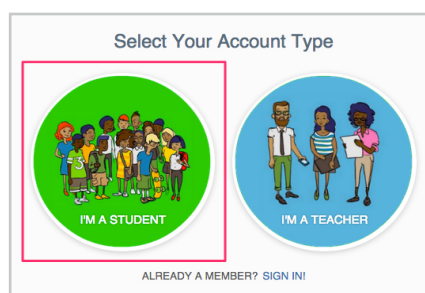

STEP 1:

Students will go to www.thinkcerca.com and select “Create an Account.”

STEP 2:

Students will select “I’m a Student.”

STEP 3:

Students will enter their first name, last name, email, password, and school name. You’re also able to create an account using your Google ID (Gmail) by clicking “Sign up with Google ID.”

NOTE: Students are not required to have a real email address. Teachers usually provide students with a protocol that works well, but we do not require a real email to be authenticated.

STEP 4:

Students will enter the 6-character code to enroll themselves in the class.
